1. Claims 13-24 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or reasonably suggest the metering unit, as disclosed by instant claims 13-24, particularly including the metering cavity which may communicate with the material feed duct, the material outlet orifice placed on the wall of the metering cavity, the valve in the form of the cylindrical rod designed to slide through and close off the material outlet orifice, the piston mounted so as to slide coaxially around the valve so as to allow the volume of the metering cavity to be varied, the side wall of the piston having the through-passage suitable for permitting material to be conveyed between the material feed duct and the inside of the piston, the valve being designed to momentarily close the through-passage. Multiple references are cited on the International Search Report as "X" references. However, these references do NOT disclose the limitations mentioned above. For example, none of the references disclose the valve being designed to momentarily close the through-passage of the piston (of course in view of all the other claim limitations given to the valve and the piston).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOSEPH LEYSON whose telephone number is (571)272-5061. The examiner can normally be reached on M-F 9AM-5:30PM.
